

# CENTRAL TERMINAL FOR MR HAND HELD SYSTEM FOR USE BY CENTRALLY LOCATED STATIONS AND ALSO PRINTED LOG OF EVENTS ON THE SYSTEM

- **Time and date stamping of messages**
- **Parallel printer output**
- **Easy to use intuitive user interface**
- **40 x message memory**

The Central Terminal is a multi-function device capable of receiving messages and displaying them on an LCD display. It is also able to print messages direct to a parallel printer.

Used in conjunction with the MR Portable Transmitter and Pager system, this unit will give both central monitoring of a system, and also an audit trail of events, required in many Health and Safety situations. **Ref: MDH 2000**

The system can handle any number of pagers or personnel units and can be added to at any time, enabling the system to grow with your business or organisation.

The anticipated call range from the "MR" personnel unit to the Central Terminal is up to 250 metres, covering most large buildings and office sites, depending on the local topography.

All the equipment conforms to the UK licensing requirements & CE regulations.

**No pager contract is required.**
